

To my elected representatives,

I would like to express my support for the proposed House Bill 6855. I understand that the bill if passed, would significantly improve the availability of transitional and permanent supportive housing, maintain the Home's high quality of health care and substance use treatment services and potentially make these services available to more vets.

In addition, oversight and program monitoring would be improved and there would be opportunities for helpful input from the residents.

Thank you for your concern and efforts to help our veterans!

Sincerely,

Michael Soldan
